

IF - ELSE

SWITCH CASE

* IF - ELSE *

Code

```
if (condition) {  
    // code run if true.  
}  
else {  
    // code run if false.  
}
```

```
int a=10, b=20;  
if (a>b) {  
    "a is grater";  
} else {  
    "b is grater";  
}  
01+ - b is grater
```

VVI

variable = (condition) ? expression true : capre false;

* Switch Case *

* Switch (expression) {

- Case 1:
// if 1 case meet condition
break;
- Case 2:
// if 2 case meet condition
break;
- default:
// if No any case meet condition
break;

}
